Career Objective:

I am MD Abu Raian Sakil. A hard-working front end developer from Bangladesh. I usually create responsive websites with react.js. I emphasise design while doing each project. My goal is to clear the code and finish the project on time.

Skills:

- **Expertise:** HTML5, CSS3, Bootstrap, Tailwind, JavaScript, ES6, React.js, React Hook, React Router, Firebase, Node JS, Express JS MongoDB.
- **Familiar:** Daisy UI, Material UI, Wordpress.
- **Tools:** Vs Code, Notepad++, Git, Github, Chrome Dev Tools, Netlify, Heroku, Figma, Firebase, Photoshop, Illustrator.

Projects:

1. **Electronics Warehouse**   **Live Website** || **Github-Client** || **Github-Server**
   - Login, Registration, Email verification, Reset password system added.
   - Responsive website and user friendly.
   - Inventory Management Edit, Delete, Add and My Items delete implement

   The equipment used to create the website: react, bootstrap, react bootstrap,, react router dom, firebase, react firebase hooks, react toastify, react scripts, node js, express js, mongo db.

2. **Raian Learning Home**   **Live Website** || **Github-Client**
   - As seen on this website, Raian teaches students in three categories.
   - Responsive navbar, banner carousel, realistic footer..
   - Users can go to all routes from the navigation section.

   The equipment used to create the website: react, bootstrap, react bootstrap, react dom, react router dom, firebase, react firebase hooks, react toastify, react scripts

3. **Computer Shop**   **Live Website** || **Github-Link**
   - .This website basically shows customer reviews.
   - Responsive and beautiful design.
   - Four charts are shown on the dashboard

   The equipment used to create the website: react, bootstrap, react bootstrap, react dom, react router dom, react toastify, react scripts
